

# Teledentistry

Don't wait at home in pain.  
Get dental relief from a  
TeleDentist...now!

Virtual dentists wherever and whenever a dentist is needed 24/7/365. Our Board Licensed consulting dentists evaluate, diagnose and resolve your dental problem. No need to miss work or school. Help is right at your fingertips!

The process will save you hours in waiting in an emergency room. Spend less time painfully waiting in traffic and more time getting answers from one of our licensed TeleDentists.

Our TeleDentists can prescribe proper medication and instructions to help put your mind at ease. We will even get your dental appointment scheduled with a dentist in your area as soon as possible if dental work is needed.

## Common Uses:

- Advice on broken, sensitive, or mis-aligned teeth
- Understanding a proposed treatment plan
- Advice as to whether your problem is medical or dental
- Suggested treatment for oral sores, lesions, and other conditions
- Advice on post procedural pain
- Answers to common dental questions:
  - When does my child start to get or lose teeth?
  - Is this tooth in the right place?
  - Do I need braces?
  - Why is this tooth dark?
  - My gums bleed when I brush my teeth. What's wrong?

## How Teledentistry Works

Use your smart phone, computer or tablet to go to the URL provided and click "Speak to a Dentist Now."

Answer brief questions about your personal info, prior medical conditions and why you are seeking help.

In less than 10 minutes, a dentist will review your information and then meet you for a video consult to resolve your problem.

The dentist will ask questions, recommend solutions (including pain relief) and explain what it is likely to cost.

If you need non-narcotic medication, it is sent to your pharmacy of choice. If you need a face to face visit, we'll help you schedule it!
