

# Better student care starts here!

Most colleges and universities are scrambling to keep up with the mental and physical health care their students need. With 2 out of 3 students who are no longer in college dropping out because of a mental health issue, our virtual care solutions are more critical than ever!

## **Deliver quality care for little cost.**

Give your students 24/7 access in minutes to doctors, counselors, therapists and more by phone, video or app at no cost to them.

## **Supplement your on-campus programs.**

Reduce excessive wait times with real-time quality care, giving much-needed relief to your overwhelmed on-campus providers.

## **Boost student retention and performance.**

When your students are getting the care they need, they are empowered to focus on their education and achieve their goals.

## **Attract more students to your university.**

Differentiate yourself by showing current and prospective students and parents that you are innovative and cutting edge.

## **Improve physical, mental and sexual health.**

The quicker students are able to access care, the faster they are able to get healthy and back in the classroom where they belong.

## **Provide safer, more comprehensive care.**

Eliminating the need for students to go off campus to receive care will keep them on campus, increasing their safety.
